

2018 Harvest Record Highland Lake

Help us improve the fishing experience at Highland Lake by removing bass 15 inches or less in length. In cooperation with Southern Pond Professionals, we have set the target harvest this year at 25 lbs per acre. Please fill out your name, date, and harvest weight for the day so we can record this and maximize our lake's potential. Removal of small bass allows for a larger population of prey for the remaining bass and crappie. More prey means higher growth rates and a chance for our anglers to catch larger fish. If you would like more information about our lake's management, you can go on our website where we have the full evaluation explained in greater detail. Once completed, please save this form to your computer and then email the file to info@townofhighlandlake.com or print and bring to Town Hall. THANK YOU!
